Project Context

- **Problem:** Players need a fast-paced, engaging experience that tests strategy under pressure.
- **Solution:** A dystopian clicking game where players must fulfill strict quotas before the timer runs out.
- **Stakeholders:** End-users (players looking for quick, addictive gameplay) and our Course Customer.

TIME FOR DEMO!

Team

- Varvara (Product Owner) — customer feedback, documentation, design idea
- Rustam (Scrum Manager) — management, development, documentation
- Yaroslav (Developer) — lead developer, Godot consultation
- Bogdan (Developer) — development, documentation, 3D modelling
- David (Developer) — development, 3D modelling

Requirements

- Functional Priorities:
 - Must: Core clicking loop, Timer, Quota system.
 - Should: Upgrades and shop.
- Quality Requirements:
 - Performance Efficiency: Maintain 60 FPS during heavy click events.
 - Usability: Clear, immediate feedback for every interaction.

Roadmap

- Current State: Stable MVP with core gameplay
- Next Sprint:
 - addressing customer feedback (more gimmicks)
 - improvement of visual style
 - Implementation of other planned gameplay features

Client Collaboration

Client likes the project and suggests more game-design ideas to make the game more engaging for players.

Thank You!
